

The **Glutz** range from Price & Oliver represents Swiss engineering at its very finest.

Simple timeless designs, coupled with outstanding build quality, make this stainless steel range suitable for the most demanding situations.

Such is the faith that **Glutz** have in their own engineering, they even offer a 25 year warranty on their lever furniture and sash lock case combination.

The **Glutz** range has recently been specified and used on the refurbishment of the Bundesrat in Berlin, but is equally at home in all types of high-end commercial and residential projects.
