

Normbau

German design in colour

Normbau hardware systems are renowned for their high quality performance and aesthetics. The choice of colours and depth of range provides a truly integrated and versatile system of hardware particularly suited to healthcare and educational applications.

Normbau is a logical first choice for applications where a strong visual contrast is desired, whether simply for aesthetic reasons or to satisfy the recommendations of the DDA.

We show just a small selection of what is an extensive range including a comprehensive programme of fittings for special needs applications.

Normbau

German design in colour
