

AX11 Bedroom Door Set with Pinch Grip First and Second Entry Anti-Barricade

Application

For rooms where an emergency auxillary entrance is required.

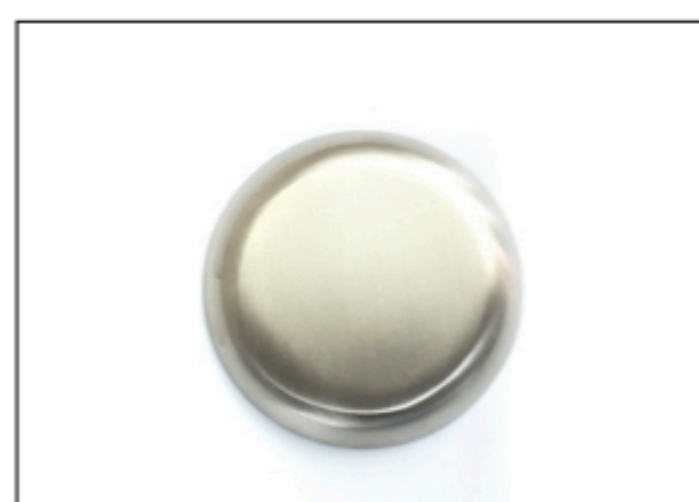

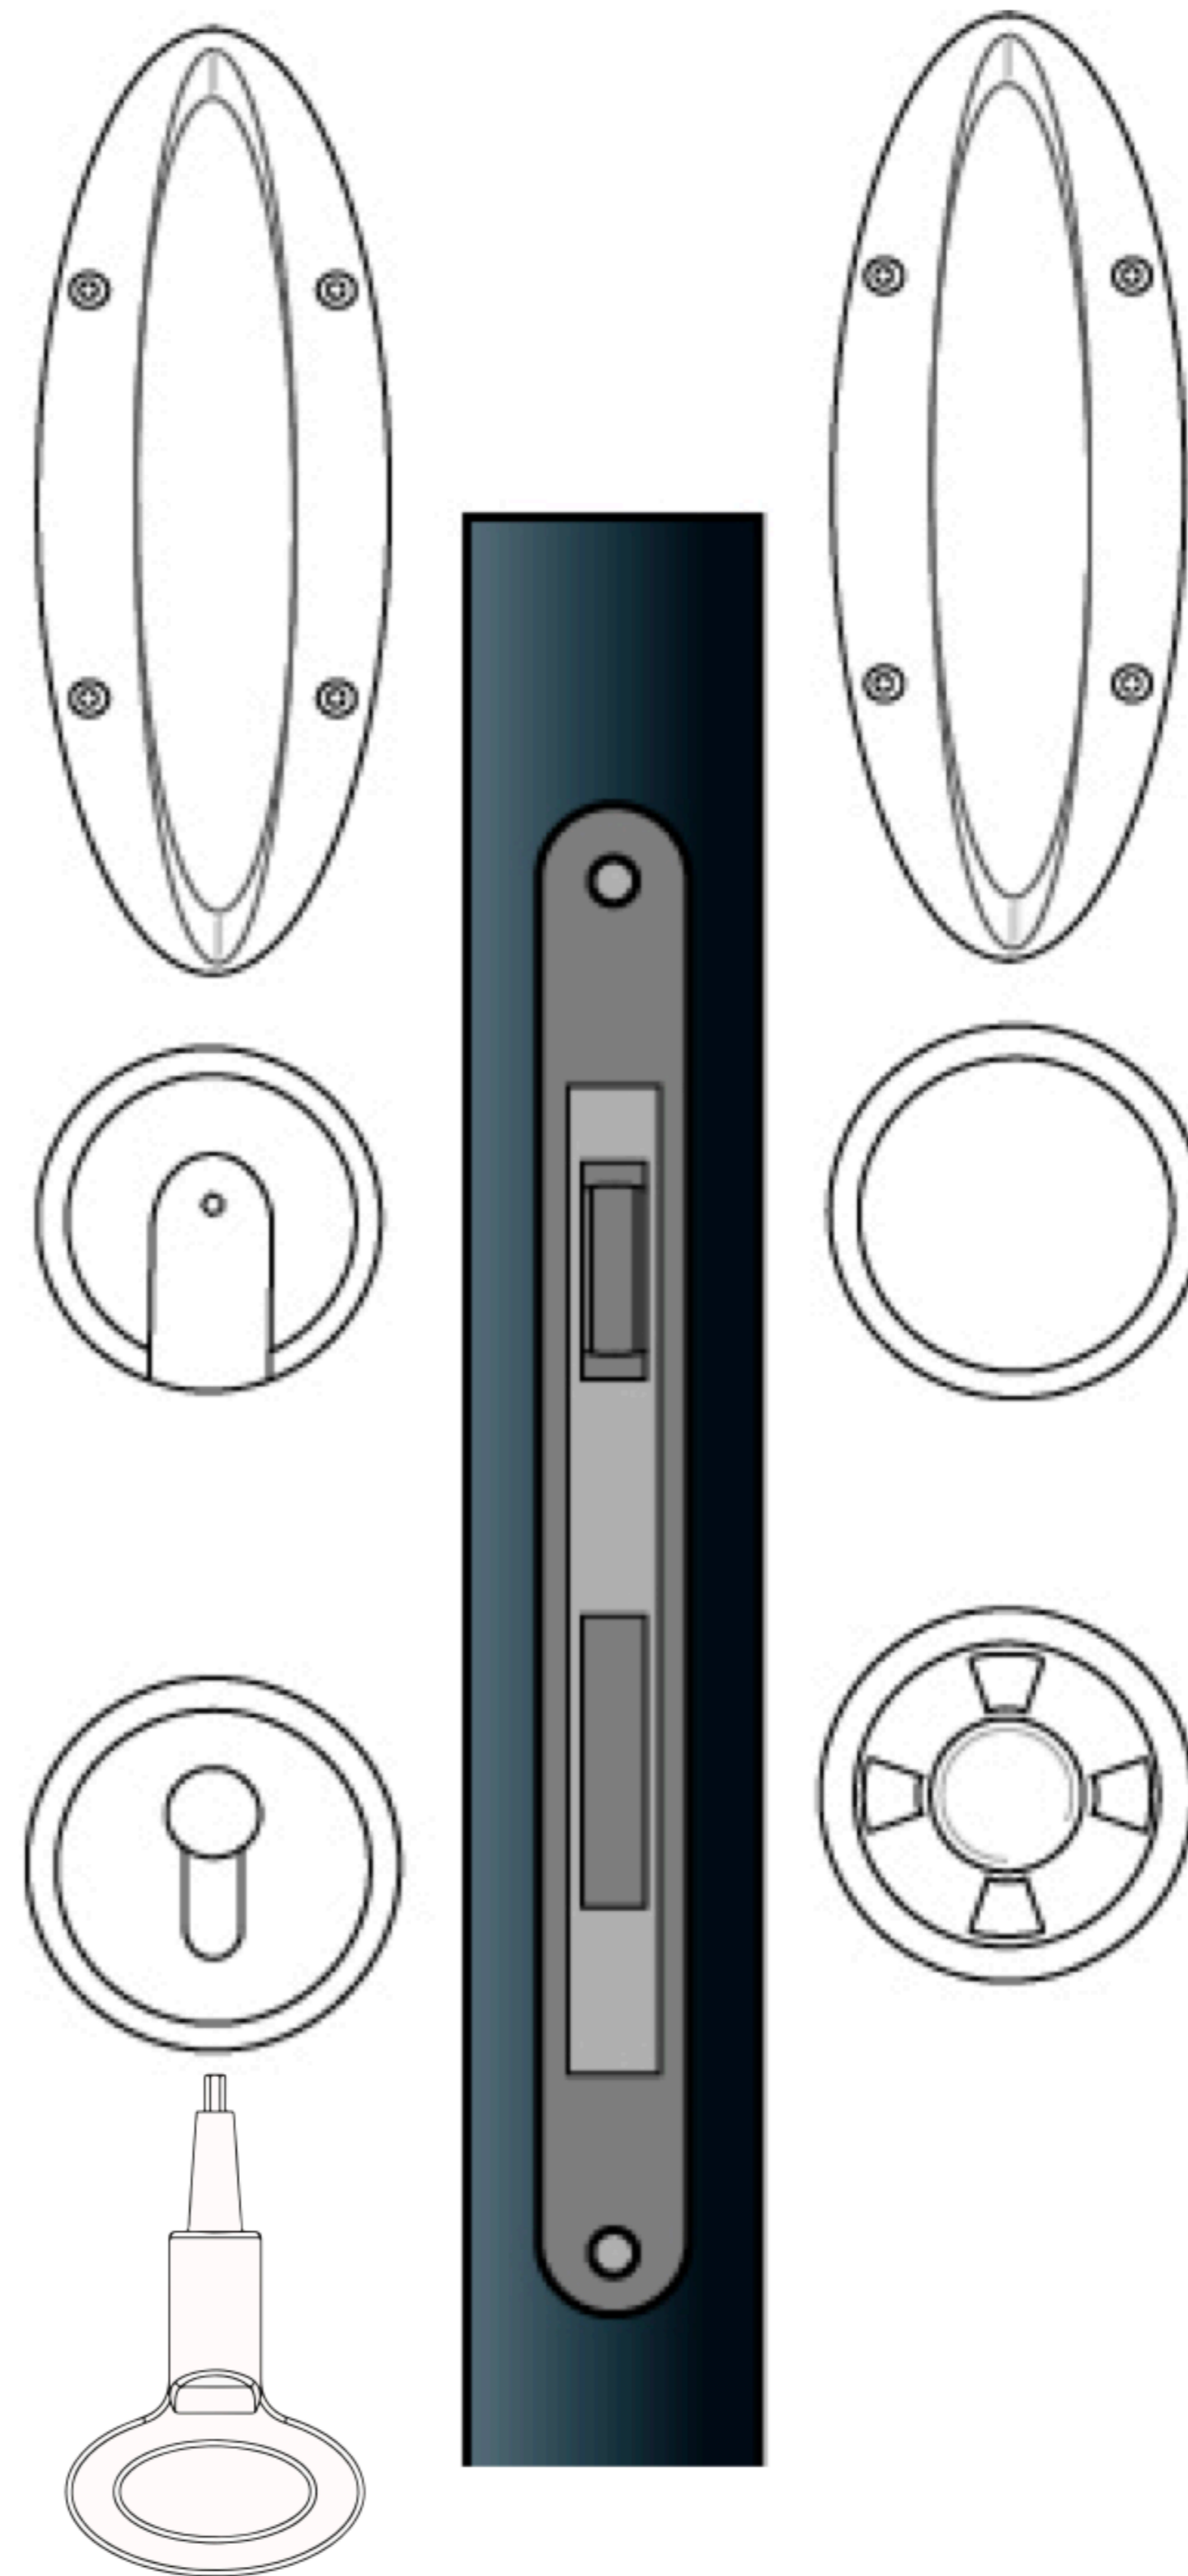

The roller ball latch allows the door to be pushed/pulled. Internally, the door can be locked for privacy with the 34820 cylinder bowling ball turn kit.

Key entry from the outside if the door is locked using our Override Cylinder which disengages the turn on the inside of the room.

If the first method of entry cannot be accessed for any reason, the second release will independently withdraw the deadbolt. The second release is accessed using a security key from the outside, concealed behind a slide cover.

Includes Approved Intumescent Kit.

For cylinder suiting please call.

Optional TiO₂ EcoPure Anti-Microbial Coating is available preventing the transfer of bacteria and viruses from the door hardware.
